

All Day Kindergarten

Not good for kids
Not good for parents
Not good for any of us

- No body of research supports 3 to 5 year olds being in school **all day**.
- Parents may actually end up **paying more, not less**, for childcare.
- Homecare providers – **most of whom are women** – may lose substantial amounts of income.

At a time when **U.S. President Obama** is beginning to offer parents unprecedented choice in education, the McGuinty government is actually restricting our options and forcing families into a 'one-size-fits-all' model. Why is his government doing this?

To learn more and to join the growing number of Ontario families fighting back against this **top down decision**, contact us at:

www.kindergartencredit.ca

Kindergarten Credit is a grass roots organization of volunteers with no political or religious affiliations. Our goal is to ensure that Ontario families have educational policies that actually work for them.
